

2 years ago: With two years in the books, I am continually amazed at how God has orchestrated this ministry, and I am privileged to be a part of it. We have seen our ups and downs, slow times and busy times. We have accepted our second intern. Our internship is one part of our 4 main goals; Mobilize. We want to help guys serve the Lord with their technology abilities. Lance is helping develop many of the tools we have been waiting to create. I find great joy Solving tech problems or enhancing ministry they are currently doing, or opening their eyes to new areas of possibilities through technology. We need more churches to desire a partnership with our ministry and commit to take techPartner on for monthly prayer and financial support. God is able to do above and beyond more than I could ask or think, to Him be the Glory. We will continue to remain faithful and pursue the paths He puts in front of us.

10 years ago we started on the path of missionary-supported servants to help missionaries, ministries, and churches and pastors around the world with using technology to further the great commission. Fifteen churches and about twenty individuals make up our current ministry support team. We could not do this ministry without them praying and giving each month. We are currently around 85% of our monthly needs.

Every day: 12,500 people are born 40% of the world population <http://www.worldometers.info/world-population/> With nearly 2.1 billion people on the internet (30% of the world **7.015 billion**). According to several different sources they estimate true believers in Christ make up 10% of the world's population.

Future: What does the future hold? - I have no idea! So we will take it a day at a time and daily help ministries, create tools, produce videos, and websites, train people, and answer tech questions until Christ returns for His Church or until He changes the direction of our path. Until then we continue steadfast in the ministry. We need your help and prayers. Please contact us if we can help you or if you are interested in partnering with us.

Don't forget to follow us on facebook and twitter!!!

New Resource from techPartner

Have you ever needed to send a large file to a person via the internet? You attached it to an email and "sent" it. Hours later you get a reply from your email provider that your email did not send because it was too large of a file to send via email. Many people have come to us with this problem and for years I have sent them to you sendit.com. For years they were the solution until they lowered their sending limitations. So, we thought it would be a good idea to help our partners with a simple solution.

I would like to introduce you to sendit.techpartner.org. As a registered user you can send two large files at a time up to 250mb each. You choose your recipients' email and upload your files and away it goes. They will receive an email with a link to the file. Your file will be removed after several days for security purposes. This tool is contained 100% on our server and it intended to provide confidence while entrusting us with your files. All this is a free service of techPartner.

techPartner TV – Episode 1 – How to send large files over the internet

Some Prayer needs:

- Kara just got braces on
- Looking to replace our van
- Lauryn's outreach to our neighbor
- Dax's desire to make friends
